Cool Furniture and Interiors Limited

COMPANY PROFILE 2026

Ugandan manufacturing for homes offices schools institutions and major projects

KIREKA KAMPALA UGANDA

BUILT FOR REAL PROJECTS

Furniture that must work last and arrive on time

> **We bring design, manufacturing, sourcing, installation and after-sales support together under one accountable team.**

The Cool Furniture and Interiors team

Established in 2013, Cool Furniture and Interiors Limited has grown from a small Mawanda Road workshop into a multi-service furniture and interiors business serving residential, commercial, hospitality and institutional clients. Our profile combines the company's original corporate history with its current manufacturing, project and sourcing capabilities.

Leadership	Amon Gamparo Managing Director and Anita Komugisha Secretary Director
Core capabilities	Furniture production upholstery steel and timber work joinery office supply interiors installation and stone works
Priority growth market	School and institutional furniture including large multi-site programmes
Delivery model	Consultation design sample approval production inspection packing distribution installation handover and after-sales

Locally manufactured office furniture

02 OUR STORY

Built through customer trust and practical craftsmanship

Amon Gamparo Managing Director

Cool Furniture and Interiors was established in 2013 on Mawanda Road. The business developed around four disciplines that remain central today: customer service, quality, value for money and innovation. The company later expanded its product range, team and installation services and now operates from Kireka.

Our experience spans custom furniture for individual clients, coordinated furniture packages for commercial spaces, hospitality and residential developments, and manufacturing approaches suitable for institutional orders. We aim to build long-term relationships by staying involved from the first measurement to the final inspection.

> **Our ambition is to become a leading furniture manufacturer and supplier recognised for dependable quality responsive service and sustainable growth.**

02 DIRECTION

Vision mission and values

Vision

To become a leading furniture manufacturer and supplier known for dependable quality, responsive service, high customer satisfaction and sustainable business growth.

Mission

To provide durable, attractive furniture and interior solutions that give clients value for money through skilled people, appropriate machinery, improved technology and controlled production methods.

Values

- Customer focus through careful consultation measurement and clear communication
- Quality workmanship in materials joints finishes installation and handover
- Honesty and accountability in pricing schedules and contract delivery
- Teamwork mutual respect and hard work across every department
- Long-term relationships with clients employees suppliers and manufacturing partners
- Creativity that produces elegant useful and inspiring furniture

Custom upholstery and furniture finishing

03 LEADERSHIP

Management close to the work

Direct leadership connects the client brief to design production procurement delivery and after-sales

Leadership and the wider Cool Furniture team

Leadership

Managing Director Amon Gamparo leads the company with Secretary Director Anita Komugisha and a management team responsible for client engagement, design, production, procurement, finance, human resources, logistics and site delivery.

People behind delivery

Company materials report more than 30 staff, supported by managers, sales executives, carpenters, upholsterers, tailors, metal fabricators, sanding and spraying teams, installers and administrative personnel. For a large contract, a named project coordinator links approvals, material purchases, factory output, dispatch and handover.

04 BUSINESS MODEL

Local production connected to wider choice

A balanced model supports custom work repeatable batches complete fit outs and selected international sourcing

Revenue and delivery line	What the client receives
Locally manufactured furniture	Custom and batch-made timber steel board and upholstered products
Office furniture supply	Locally made desks and storage plus selected imported systems and ergonomic seating
Interior fit outs	Space planning partitions ceilings floors blinds joinery furniture installation and finishing
Residential and hospitality	Bedrooms living rooms kitchens wardrobes restaurants reception areas and sample-room rollouts
Joinery and building components	Doors frames panels cabinets shelving skirting wooden floors and built-in storage
Stone works	Marble and granite measurement fabrication installation polishing and workmanship support
Maintenance and after-sales	Furniture repair refinishing inspections defect correction and repeat-order support

Why the model is resilient

The company can serve multiple end markets while using shared design, production, finishing and installation skills. Local production supports fast customisation and domestic value, while direct sourcing expands the office range. This combination is relevant to funders and large buyers because growth is not dependent on one product category alone.

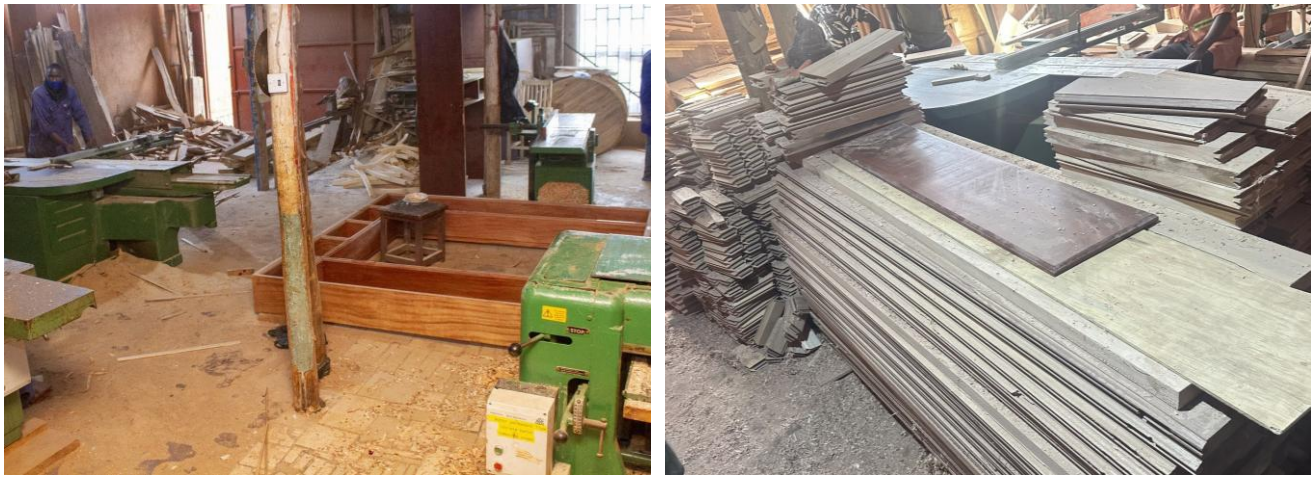

Showroom range in Kireka

05 MANUFACTURING

From material to finished product

In-house production gives clients control over dimensions materials colours finishes and inspection stages

Workshop machinery and prepared production materials

We manufacture solid-timber, board, upholstered and steel-framed furniture. The workshop supports one-off custom pieces and repeatable batches for offices, schools, hotels, apartments and homes. Most materials are sourced in Uganda where suitable, helping the company respond quickly and increase local content.

Production activities

- Technical review of drawings dimensions finishes and bills of quantities
- Timber selection preparation machining sanding treatment and varnishing
- Steel cutting welding grinding preparation painting and frame inspection
- Cabinet and joinery fabrication using hardwood boards hardware and fittings
- Upholstery frame construction foam cutting sewing assembly and finishing
- Final assembly inspection protective packing dispatch and site installation

05 EQUIPMENT AND PROCESS

Practical machinery supported by skilled hands

The original company materials identify a spindle moulder, band saw, sliding cross-cutting saw, surface planer, thicknesser, heavy-duty compressor and hand tools for sanding, finishing and spraying. Production capacity depends on how these resources are scheduled, maintained and matched to trained operators.

Cabinet production in progress

Stage	Control focus
Design and measurement	Approved dimensions drawings finish schedule and bill of materials
Material preparation	Species grade moisture treatment steel sections boards hardware and fabric
Fabrication	Accurate cutting sound joints weld quality bracing alignment and safe edges
Finishing	Surface preparation colour paint and varnish coverage drying and curing
Assembly	Stability dimensions accessories floor protection and conformity to the sample
Release	Quantity inspection identification packing destination and dispatch records

06 LARGE ORDERS

A controlled path from one sample to many units

Scale is achieved through planning jigs parallel workstreams inspection gates and route-based dispatch

1	4	1000+	1
APPROVED SAMPLE	CORE WORKSTREAMS	ORDER POSITIONING	ACCOUNTABLE TEAM

1 **Plan the lot** Break the schedule into daily and weekly targets by furniture type and destination.

2 **Approve the control sample** Confirm dimensions materials ergonomics colour finish and workmanship before full production.

3 **Secure and verify materials** Record timber steel boards hardware fabric finishes and treatment evidence.

4 **Run parallel workstreams** Coordinate timber metal upholstery finishing assembly and packing so production continues smoothly.

5 **Inspect each batch** Release work only after material fabrication finish and final-assembly checks.

6 **Dispatch by route** Label and pack quantities by site room and delivery sequence for traceable handover.

Batch production and dispatch operations

07 SCHOOL FURNITURE

A priority capability for public education programmes

Local manufacturing custom steel and timber fabrication and multi-site logistics can be organised around an approved school-furniture standard

Institutional furniture setting

We can manufacture furniture for classrooms, ICT rooms, libraries, laboratories, multipurpose halls, staff rooms and administration blocks. Designs can follow the purchaser's drawings, bill of quantities or an approved control sample. The range can combine seasoned hardwood work surfaces and seats with fabricated steel frames, durable finishes and replaceable floor protectors.

Why local manufacture matters

- Direct factory inspection and sample approval
- Custom dimensions finishes engraving and buyer identification
- Local repair capability and after-sales visits
- Domestic value through Ugandan labour and locally sourced materials where compliant
- Distribution planning by lot district school room and item code

07 SCHOOL PROGRAMME SCALE

Planning against the 72-school benchmark

> **The attached USEEP tender is a buyer benchmark—not a claim of completed supply by Cool Furniture.**

72	740	53,280	9
NEW SCHOOLS	PIECES PER SCHOOL	TOTAL PIECES	PROCUREMENT LOTS

High-volume item	Benchmark quantity across 72 schools	Production implication
Three-seater twin desks	11,520	Dedicated steel and timber lines jigs and sample-controlled assembly
Multipurpose hall chairs	14,112	High-throughput frame seating finish and packing workflow
Laboratory stools	8,928	Repeatable frame geometry durable finish and stable floor contact
Computer chairs	4,320	Ergonomic specification assembly inspection and room-based delivery

For any specific lot, the company should prepare a measured output plan based on available machinery, shifts, labour, suppliers, current commitments and cash flow. A major tender should be supported by recent production records rather than relying on the marketing profile alone.

Priority readiness actions

- Build and test a compliant classroom desk prototype
- Document weekly output by workshop activity
- Secure material suppliers and treatment certificates
- Prepare district delivery routes and acceptance records

08 CLASSROOM DESK

Production readiness for the three-seater twin desk

The central classroom item requires repeatable geometry verified materials safe edges strong fixing and a durable finish

Component	Tender specification reference	Production control
Frame	25 x 25 x 2 mm square hollow steel sections with matching bracing	Verify section size frame geometry welds and stability
Floor protection	25 x 25 mm hard-rubber shoes	Fit securely and confirm level contact
Writing top	25 mm seasoned hardwood 1500 x 400 mm	Check treatment moisture dimensions sanding and varnish
Fascia and shelf	245 x 1500 mm fascia and 325 mm hardwood shelf	Use jigs for repeatable positioning
Seat	300 x 1500 mm hardwood	Inspect edge finish fixing points and alignment
Assembly	Timber fixed to the steel frame with 75 mm screws	Check torque protrusions sharp edges and stability
Finish	Painted steel and clear-varnished timber to approved drawings	Compare colour gloss coverage and workmanship with the control sample

Material evidence

The tender calls for new materials, treated timber, timber moisture content not exceeding 15 percent, Grade 43 steel, certificates for materials and treatment, samples and staged inspections. These are purchaser requirements and should be confirmed against the final signed contract.

Repeatable frame production supports consistent institutional furniture

09 COMPLETE SCHOOL PACKAGE

Furniture for every learning and administration space

Area	Furniture products	Delivery focus
Classrooms	Three-seater twin desks teacher tables and teacher chairs	Durable steel and hardwood construction controlled by sample and drawing
ICT rooms	Large and small computer tables computer chairs office tables and chairs	Stable work surfaces cable-aware layouts and ergonomic seating options
Libraries	Reading tables chairs bookstore tables shelving and storage	High-use furniture for study circulation and record spaces
Multipurpose halls	Hall chairs teacher tables and flexible event furniture	Stacking layout repeatable batches and room-based delivery
Administration	Office desks chairs staff-room furniture filing and storage	Local custom joinery plus selected imported office systems
Science laboratories	Laboratory tables stools PWD tables and teacher chairs	Stable frames washable surfaces and accessible approved layouts

Additional education products

The same platform can support dormitory beds, library shelving, filing cabinets, reception counters, staff workstations, wardrobes, cafeteria seating and custom storage. Each item should be priced, sampled and scheduled against the purchaser's approved specification.

Work furniture and institutional seating environments

10 QUALITY ASSURANCE

Quality that can be inspected and recorded

Approved materials repeatable fabrication checks and documented acceptance reduce defects and protect the delivery programme

Control point	What is checked	Typical evidence
Materials	Timber species moisture treatment steel grade sections boards hardware fabric and finishes	Certificates delivery notes and incoming inspection
Prototype	Dimensions ergonomics stability joints finish and drawing compliance	Approved control sample and signed comments
Fabrication	Cuts welds joints bracing alignment fixing positions and sharp edges	Batch inspection and corrective-action record
Finishing	Surface preparation colour coverage varnish texture and curing	Finish inspection against approved sample
Final assembly	Level stability dimensions accessories floor protectors and identification	Final quality checklist
Packing and delivery	Quantity labels protection destination and condition	Packing list delivery note and receipt
Site acceptance	Condition installation completeness and specification	Inspection report snag list and acceptance certificate

Finishing and site installation activities

11 GOVERNMENT CONTRACT DELIVERY

Manufacturing discipline matched by documentation and logistics

1 **Mobilise** Confirm scope drawings quantities destinations reporting lines programme dates and contract conditions.

2 **Submit** Provide product data material details shop drawings samples and the production plan for approval.

3 **Procure** Secure and verify approved timber steel boards hardware finishes and selected imported office items.

4 **Manufacture** Produce by item and lot using jigs work instructions batch codes and inspection points.

5 **Identify and pack** Engrave or label items and package them by destination room and delivery sequence.

6 **Distribute and install** Control vehicle loads routes off-loading assembly installation and site protection.

7 **Accept and support** Complete joint inspections correct defects issue handover records and manage warranty service.

Packing loading and route planning are part of contract delivery

For multi-school programmes, the dispatch register should connect every item to a lot, district, school, room and serial or engraving code. Delivery notes, signed receipts, installation records and acceptance certificates should use the same coding.

12 OFFICE FURNITURE

Workspaces planned around people technology and brand

We combine local custom manufacturing with selected sourced systems to give clients more choice across price design and performance

Locally manufactured office furniture and imported seating options

Products

- Executive desks conference tables reception counters and meeting furniture
- Modular workstations benching systems partitions and collaborative tables
- Ergonomic task chairs executive chairs visitor chairs and training seating
- Metal cabinets bulk filing systems bookcases lockers and safes
- Office accessories including bins paper trays coat hangers flip charts and phone stands
- Custom counters shelves cabinets and built-in storage manufactured locally

Our office process begins with the organisation's culture, headcount, technology, storage needs, client traffic, budget and future growth. Layout and product choices can then be coordinated with power, data, acoustics, circulation and brand finishes.

13 CHINA MANUFACTURER NETWORK

Direct office-furniture sourcing with local accountability

Company management maintains direct contacts with office-furniture manufacturers in China for projects that require additional systems finishes or price options

> **International sourcing expands choice. Cool Furniture remains the local point of coordination for specification delivery assembly installation and support.**

Sourcing stage	Cool Furniture role
Product search	Shortlist suitable desks chairs workstations storage and meeting systems from manufacturer catalogues
Technical comparison	Compare dimensions materials mechanisms finishes warranties packing and compliance requirements
Samples and approval	Coordinate product samples finish samples or detailed technical submissions where required
Factory quotation	Obtain manufacturer pricing and align it with quantities accessories spare parts and delivery terms
Shipping and clearance	Coordinate the supply programme with freight and local delivery arrangements through appointed service providers
Local delivery and assembly	Receive inspect assemble install snag and hand over the approved office package
After-sales communication	Act as the client's local contact for warranty issues replacement components and future matching orders

Responsible claim

This manufacturer network is an office-furniture sourcing capability. School furniture and locally fabricated items should be presented separately and supported by Cool Furniture's own production plan, samples, material evidence and factory inspections.

Office seating category

14 OFFICE FIT OUTS

One coordinated interior from plan to handover

Custom joinery and on-site installation

We plan, supply and install office interiors so furniture works with the surrounding space. The scope can include space planning, furniture layouts, aluminium, glass and gypsum partitioning, acoustic ceilings, raised floors, carpeting, blinds, doors, windows and custom joinery.

Fit-out sequence

1 **Survey** Measure the site and confirm services access circulation and client requirements.

2 **Design** Prepare layouts material selections furniture schedules and coordinated finishes.

3 **Approve** Confirm drawings samples costs programme and responsibilities before work begins.

4 **Deliver** Coordinate fabrication procurement site works furniture installation and snag correction.

5 **Handover** Inspect the finished space issue records and provide after-sales contacts.

15 HOMES HOSPITALITY AND DEVELOPMENTS

Custom furniture scaled from one room to a full property

Living-room furniture and custom tables

Homes

We manufacture sofas, beds, dining sets, wardrobes, television units, coffee tables, occasional chairs, outdoor pieces and fitted storage. Clients can select dimensions, timber, boards, foam, fabric, colour, hardware and finish to suit the room and budget.

Hotels apartments and developments

For larger properties, we can repeat approved room types across bedrooms, public areas, restaurants, reception spaces and back-of-house areas. A sample room or prototype provides the reference for quantities, finishes, cost control and installation quality.

Experience named in company materials

Company materials name Aragan Hotel in Adjumani, Amoti Hotel in Gulu, Kiho Safari Lodge in Bwindi, housing projects and apartment developments among the markets and projects served.

16 KITCHENS WARDROBES AND JOINERY

Made to measure installed as part of the space

Kitchen cabinetry and wardrobe installation

Our joinery work includes kitchens, wardrobes, vanities, doors, panels, frames, skirting, shelving, cabinets, wooden floors and built-in storage. Site measurements and shop drawings guide production before delivery and installation.

Material options

Depending on the approved specification, cabinetry can use hardwood, MDF, block boards, high-gloss boards and coordinated hardware. Door work includes hardwood, flush and selected plastic door types in different sizes and designs.

Control before installation

- Verified site dimensions and service points
- Approved elevations finishes and hardware
- Factory checks before delivery
- Protected transport and labelled components
- Level alignment sealing cleaning and final snag correction

17 MARBLE AND GRANITE

Stone surfaces measured fabricated and installed end to end

Stone fabrication and polishing

The stone division supplies, fabricates and installs marble and granite surfaces for homes, hotels, offices and institutional projects. The process can include site measurement, templating, slab selection, cutting, edge profiling, polishing, delivery, dry fitting, levelling, bonding, jointing, sealing and final inspection.

Applications

- Kitchen worktops islands breakfast bars and splashbacks
- Vanity tops shower thresholds and window sills
- Stair treads risers skirting and floor slabs
- Wall cladding reception counters bar tops and table tops

Workmanship support

The installation team checks templates, slab orientation, edge details, support, levels, joint colour, sealing and final cleaning. Warranty terms and the remedy process should be stated in each quotation or contract.

18 CLIENTS AND SECTORS

Experience across organisations properties and public-facing spaces

The following names and project categories appear in the company's supplied materials. For a tender or funding review, each reference should be supported separately by a contract or purchase order, delivery evidence, completion documentation and a current client contact.

Sector	Organisations or project types named	Relevant capability
Banking and finance	Bank of Africa Centenary Bank FINCA Uganda Stanbic Bank	Desks seating counters storage and office interiors
Healthcare	Mulago National Referral Hospital	Durable institutional furniture and storage
Media and creative	New Vision and Twine Shots Studios	Office furniture production spaces and custom interiors
Transport and business	Uganda Airlines BNI members and Rotary members	Office supply customised furniture and meeting environments
Hospitality	Aragan Hotel Amoti Hotel and Kiho Safari Lodge	Bedrooms public areas restaurants and joinery
Property	Housing projects apartments offices and restaurants	Kitchens wardrobes doors loose furniture and fit outs

Custom seating for a large assembly space

18 PROJECT GALLERY

Work at the workshop and on site

Fabrication installation fitted kitchens completed interior joinery

> **A strong case study should show the client need the approved solution the quantities the delivery period and evidence of completion.**

The website and future profile editions should prioritise documented before-and-after stories for school furniture, office fit outs, hotels, kitchens, institutional seating and major residential developments.

19 AFTER SALES

Support that continues after handover

Site installation and finishing support

Service commitments

- Progress updates during design production procurement and installation
- Coordinated delivery assembly and installation with the client or project manager
- Snag-list correction before final handover
- Prompt response to workmanship concerns during the agreed warranty period
- Technical inspections repairs replacement components and refinishing where applicable
- Support for future additions that need to match approved dimensions materials and finishes

Warranty approach

Warranty terms are confirmed in each quotation or contract and should identify the product, workmanship period, exclusions, response route and remedy. Large contracts can include site inspections, spare components and named service contacts.

19 SUSTAINABILITY

Local value practical durability and responsible growth

Timber stock and material preparation

The company aims to use Ugandan materials where they meet the approved specification. Local manufacturing creates work for craftspeople, reduces unnecessary transport for custom products and gives clients access to repair and refinishing rather than automatic replacement.

Priorities for stronger environmental reporting

- Record timber species sources treatment and moisture-control evidence
- Track material yield off-cuts reuse and responsible waste disposal
- Select durable hardware replaceable components and repairable construction
- Plan delivery routes and consolidated loads for multi-site projects
- Document worker safety training machine maintenance and protective equipment
- Develop measurable annual targets before making environmental performance claims

20 FUNDER CONFIDENCE

A platform for growth with evidence still to assemble

The profile shows a diversified operating business but serious funding decisions require verified financial operational and governance documents

13+	6	2	1
YEARS SINCE 2013	CORE MARKET SEGMENTS	SUPPLY CHANNELS	LOCAL DELIVERY TEAM

What supports the growth case

- An operating history since 2013 and a reported workforce of more than 30 people
- A broad product and service mix across furniture interiors joinery and stone works
- Local production combined with direct international office-furniture sourcing
- Growth opportunities in public education offices hospitality property development and institutional supply
- Existing workshop skills installation capability and named client sectors

What a funder should verify

Current corporate records, audited financial statements, tax compliance, bank facilities, equipment ownership and condition, workshop capacity, payroll and staffing, order pipeline, margins by product line, debtor and creditor exposure, signed contracts, client references, supplier terms, insurance and environmental and safety controls.

> **Confidence is strongest when every marketing claim has a current document photograph record or client reference behind it.**

20 GOVERNMENT BID READINESS

The evidence pack behind the profile

Bid area	Evidence to prepare
Legal and tax	Current incorporation and company records trading licence tax identification tax clearance and beneficial ownership information
Financial capacity	Audited statements turnover evidence bank facilities liquid assets and a contract cash-flow plan
Similar experience	Signed contracts purchase orders delivery notes completion certificates values periods and reachable client contacts
Manufacturing capacity	Machine register workshop details staffing output records current commitments and lot-specific production schedule
Technical compliance	Completed compliance schedule product data drawings control samples treatment and material certificates
Personnel	Project production quality logistics and safety leads with relevant records
Quality and safety	Inspection and test plan corrective-action process site safety worker conduct and machine-maintenance records
Distribution	Destination matrix route plan vehicle resources packing engraving installation and acceptance method
After sales	Warranty terms service contacts repair resources spare components and response timelines
China sourcing	Manufacturer catalogues quotations technical sheets sample approvals warranty terms and written supply confirmations where relevant

School tender capacity evidence

The attached tender asks a manufacturer to demonstrate at least six years of relevant manufacturing experience and annual production capacity at least twice the contracted quantity for each of the previous two years. A compliant submission therefore needs measured output records and supporting source documents.

22 WEBSITE READY COPY

Core descriptions for the designer

Short company description

Cool Furniture and Interiors Limited is a Ugandan furniture manufacturer and interiors company established in 2013. From our Kireka base, we make and install furniture for homes, offices, schools, hotels, apartments and public institutions. We combine local production with direct office-furniture manufacturer contacts in China for projects that need a wider choice of systems and ergonomic seating.

School furniture description

We manufacture school furniture for classrooms, ICT rooms, libraries, laboratories, multipurpose halls, staff rooms and administration blocks. Our team can work from approved drawings and bills of quantities, build control samples, verify materials, manufacture in batches, engrave and label items, distribute by school and support inspection and handover.

Office furniture description

We supply complete office packages including desks, workstations, ergonomic chairs, meeting tables, reception counters, cabinets, filing systems and accessories. Custom joinery is manufactured locally, while direct manufacturer contacts in China provide additional office systems, finishes and price options.

Major contract description

Large orders are managed through approved samples, material verification, batch production, recorded quality checks, protective packing, route-based delivery and site acceptance. One project team coordinates the workshop, suppliers, logistics, installation and after-sales service.

Furniture and interiors can be coordinated with major property projects
